

SIMPLIFIED INSTALLATION FOR BUILDERS...

...premium quality
for RV owners!

Velarium's Awning Roller Assembly Light Rail was designed to create an easier installation process for the awning roller assembly saving RV builders and dealers time and effort. This industry-exclusive design houses the canopy, LED lighting, and a channel to attach to the awning rail on an RV all in one unit making installation simpler and faster.

Awning roller assembly light rail comes standard with LED lighting with the upgradable option of COB or RGB lighting for better illumination and a more welcoming ambiance. Available in 20', 16', and 14' lengths, which can be easily cut down to match exact awning size. The Velarium Awning Roller Assembly Light Rail is retrofittable to competitive awning brands.

AN INNOVATIVE APPROACH TO SIMPLIFYING THE RV AWNING INSTALLATION PROCESS

- **Compatible with most awning rails, facilitating effortless installation of RV awning canopies and lights**
- **Available in lengths of 20', 16', and 14' that can be cut down and customized to fit specific awning sizes**
- **Retrofittable to competitive awning brands**
- **Constructed from black powder-coated aluminum extrusion**
- **Equipped with LED lighting as a standard feature with the optional upgrade to COB or RGB lighting**
